- > Adds extra item to document grid right-click menu for publish/check-in functionality
- > Automated check in of completed envelopes
- > Email notifications to end-users
- > Audit trail for published documents

Product Description

Before DocuSign to iManage Integration there was no easy method to leverage the security and convenience of the iManage Work DMS when working with DocuSign, the popular provider of electronic signature technology and Digital Transaction Management services. End-users would have to export their documents to their workstation and then upload these files to the website; an error-prone and tedious procedure. With the Younts' DocuSign integration utility, end-users are able to publish and check-in documents directly from DeskSite/FileSite; thus, creating a seamless and secure workflow which will enhance worker productivity and confidence in the integrity

Annual Subscription Pricing

\$25 per licensed iManage user (min. 100 users)

\$5,000 for single server user license (unlimited imports to a single iManage Work database)

\$10,000 Enterprise License

Fees paid in advance Annually

Must match iManage client license count.
